Eczema Crème Testimonial

My name is Mona and I have a son who just turned a year old. When he was about a month old his skin began to get really chapped and itchy and red. The doctors first said that it was cradle cap that had spread down to his face and body. They told me that was very common and that he would grow out of it. As time went on, it got worse and worse. They now said it was Eczema. It got to the point where he couldn't sleep at night

because he was so itchy and uncomfortable. I would have to hold his arms down at night in order for him to be able to go to sleep. He would sleep for maybe 15 minutes at a time and not more.

I was so frustrated!

At this point now I was going to the doctor's office about once a week just begging them to give me something that would work on his skin. We started using Protopic, then Elidel, and finally when these two wouldn't work, we had to go to Cutivate, the steroid crème. This finally worked...for about 2 weeks or so. Simultaneously, we were giving him internal anti-itch liquid which I'm convinced did nothing for him. He was also on many cycles of Antibiotics. He was only about 5-6 months old.

Then, when he was about 8 months old I tried the Eczema crèmes from Roop Ayurvedic Day Spa. Within two days, the patch I tried it on was healed! He finally had the baby soft skin that I had been dreaming of! I didn't see him scratch that part of his body at all. I had to order these immediately. I've been using these crèmes for the last 3 ½ months now and his skin is so beautiful! These are the "miracle" crèmes. He is so much happier now. He sleeps for hours at a time as peaceful as a baby should. He never itches or scratches himself anymore. About a week after I began using these crèmes, I threw away the Protopic, Elidel, Cutivate, the anti-itch liquid, and the antibiotic. I have not needed them since.

I would recommend these crèmes to anyone who has ever suffered from the painful and uncomfortable disease called Eczema. I even use it on myself sometimes when I get the occasional flare-up.

The best thing about these crèmes is there are no side-affects. They are all external and all natural. I think it was a blessing that I came across these crèmes and I am so grateful that I have something that works on my baby. We are all much better because of them.

Thanks so much!

Sincerely,
